

MBE Success Story

Headquartered in Houston, TX, Vizion Crane & Industrial Support LLC (VCIS) provides crane equipment, specialty lifting services, and industrial support staff to organizations in the construction sector from private to government entities.

VCIS was founded by visionary Joseph Vigier in 2010.

Prior to establishing VCIS, Mr. Vigier entered the workforce to find his purpose and place in the world, and during that time worked various jobs from a forklift operator, CDL truck driver, to a crane operator. Out of all the positions Joseph held, cranes became one of his greatest passions. Mr. Vigier's love for cranes became the catalyst that took him around the United States working at various work sites as a crane operator, and eventually beginning his own business, VCIS.

In the course of establishing his business, Mr. Vigier met Angela Freeman, HMSDC Senior Director of Corporate Services. Subsequently, VCIS successfully completed the minority business enterprise (MBE) certification process and gained visibility to opportunities designated for MBEs.

During the pandemic, VCIS' MBE status provided the visibility needed to obtain a contract with the City of Houston.

Today, in addition to maintaining its MBE status, VCIS maintains certification from National Commission for Certification of Crane Operators (NCCCO) and is an experienced operating Fixed Cabs (Carry Deck/Boom Trucks), Swing Cabs (Rough Terrain/All Terrain/Truck Crane), Crawler, and Tower cranes. VCIS' work performance includes crane services for the Warrior Stadium, global oil & gas companies, and City of Houston.

The visionary Joseph Vigier understands first-hand the experience and training required in the critical role as a crane operator on a job site. From walking the site, conducting safety meetings with project coordinators, to being the last line of defense before a lift is made.

When providing services for clients, it is not just another job for VCIS. VCIS takes pride in representing all MBE, SBE, DBE (MSDBE) & HUB companies that provides crane services, in excellence.

VCIS' words of wisdom to companies from John C. Maxwell is, *“if we are growing, we are always going to be outside of our comfort zone”*.
